## Nursery School in Covolo di Pederobba

Hidden among the vineyards and wheatfields, the Nursery School in Covolo comprises a collection of modest structures linked by a continuous series of stone walls. The new building forms an enclosure that both embraces and allows itself to be defined by the features of the landscape. A rough concrete wall is colored to match the surrounding landscape, reflecting light in various ways. The wall opens to the south, revealing the massive structure, before retracting and doubling, coloring itself to emphasize its passages. The overhang, the stabilized gravel paving and the lighting transform the threshold into a space where classroom spaces and garden meet and form the imagination of a possible world.
